

# Transition and Induction Computing Curriculum Sequence

**Intent:** To deliver outstanding outcomes by equipping all boys with the building blocks needed to create new digital technologies, and the skills to use existing digital technologies creatively and adaptively. There will be an opportunity for all learners to find a pathway of continued study in computer science and/or creative IT.

T1	T2	T3	T4	T5	T6
Graphics	Animation	Algorithms	Programming in Python	Threats and Security	Hardware and Software
<p><b>Why this topic?</b> This is a key skill required for the Creative iMedia course. Furthermore, skills with graphic manipulation are useful in all manner of IT careers even including technical paths such as software developer.</p> <p>The skills taught are also necessary for GCSE Art and Art Graphics</p>	<p><b>Why This Topic?</b> Animation is a key skill needed for Creative iMedia.</p> <p>This unit is a chance for pupils to work cross-curricular. The artefact created is a joint venture from pupil's work in computing and art lessons.</p>	<p><b>Why This Topic?</b> These fundamentals are building towards the GCSE in Computer Science and many IT professional career pathways.</p>	<p><b>Why This Topic?</b> These fundamentals are building towards the GCSE in Computer Science and many IT professional career pathways.</p>	<p><b>Why This Topic?</b> This unit forms part of the response to a need for awareness of safety concerns involving IT. This unit focusses on more technical content than the Year 7 unit and aims to address concerns that IT professionals might encounter. It is also directly linked to the unit of the same name in GCSE Computer Science.</p>	<p><b>Why This Topic?</b> This is an important unit that builds towards both GCSE Computer Science and Creative iMedia.</p>
