# Year 13 English Language Curriculum Sequence

**Intent:** For students to understand how people communicate and assign meaning (semantics), how they do things with words (pragmatics) and how language relates to social factors (sociolinguistics), psychological aspects (psycholinguistics), or power and injustice (discourse analysis).

- A Level Language feeds from KS2:**
- Identifying word types
  - Root words, prefixes, suffixes
  - Morphology, etymology
  - Thematic links between texts
  - Drawing inferences
  - Summarising ideas
  - Understand wide range of texts

<p><b>Why teach Child Language Development?</b> Studying Child Language Development allows students to understand the social, natural and psychological issues around human language. By understanding how language develops, students can critically evaluate wider societal influences and understand the importance of humanity's impact on its own development.</p>	<p><b>Why teach Language Change?</b> Language Change enables us to accommodate new ideas, inventions and technologies. It's not just the words themselves which change; the way in which we use them can shift too. In this unit, students can develop an appreciation of how humanity constantly evolves, and the shift in power caused by languages throughout time.</p>	<p><b>Why Teach Discourse Analysis and Opinion Writing?</b> Discourse analysis allows students to read and interpret critical and discursive views on a range of English topics. Students build an awareness on how a writer crafts an argument and how language theory can be woven into an engaging article or editorial. When writing their own <b>opinion pieces</b>, students learn how to craft a stylistic argument and embed journalistic techniques into their own writing.</p>	<p><b>Why teach NEAs (Language in Action)?</b> The independence of the NEA allows students to synthesise all of their learning thus far and put it into action, producing a real study of language in action. Students will begin to critically evaluate their own hypotheses, as well as the language choices of others.</p>
