

Sandbach School Maths Curriculum

Year 11 Maths Curriculum Sequence

Intent: The curriculum will further develop student's ability to interpret and model situations mathematically and develop their use of formal mathematical skills in preparation for external examinations.

HT1 Gradients & lines	HT1 Non-linear graphs & using graphs	HT2 Expanding & factorising	HT2 Changing the subject & functions	HT3 Multiplicative reasoning	HT3 Geometric reasoning	HT3 Algebraic reasoning	HT4 Transforming & constructing	HT4 Listing & describing	HT4 Show that	HT5/6 Revision & examinations
<p>Prior Knowledge:</p> <ul style="list-style-type: none"> -Plot straight line graphs -Interpret $y=mx+c$ -Equations of lines parallel to the axis 	<p>Prior Knowledge:</p> <ul style="list-style-type: none"> -Real life graphs -Conversion graphs -Reflect shapes in given lines 	<p>Prior Knowledge:</p> <ul style="list-style-type: none"> -Expand & factorise with a single bracket/binomial. 	<p>Prior Knowledge:</p> <ul style="list-style-type: none"> -Solve linear equations/inequalities -Change the subject of a simple formula 	<p>Prior Knowledge:</p> <ul style="list-style-type: none"> -Use scale factors -Ratio problems 	<p>Prior Knowledge:</p> <ul style="list-style-type: none"> -Simple angle properties -Interior/exterior angles -Pythagoras' theorem & trig ratios 	<p>Prior Knowledge:</p> <ul style="list-style-type: none"> -Find the rule for the nth term of linear/quadratic sequences. -Solve simultaneous equations. 	<p>Prior Knowledge:</p> <ul style="list-style-type: none"> -The 4 single transformations -Identifying transformations -Standard constructions using a ruler & protractor. 	<p>Prior Knowledge:</p> <ul style="list-style-type: none"> -Sample spaces & probability -Venn diagrams -Comparing distributions -Interpreting scatter diagrams 	<p>Prior Knowledge:</p> <ul style="list-style-type: none"> -This module brings together all of the aspects covered prior. 	<p>Prior Knowledge:</p>
<p>National Curriculum Links Pupils will:</p> <ul style="list-style-type: none"> -Plot & interpret graphs. -Interpret the gradient of a straight line as a rate of change. -Use the form $y=mx+c$ to identify parallel & perpendicular lines. -Find approximate solutions to two simultaneous equations in two variables using a graph. 	<p>National Curriculum Links Pupils will:</p> <ul style="list-style-type: none"> -Recognise, sketch & interpret graphs of linear functions, quadratic functions, the reciprocal and exponential function. -Find approximate solutions using a graph. -Recognise and use the equation of a circle with a centre at the origin. 	<p>National Curriculum Links Pupils will:</p> <ul style="list-style-type: none"> -Know the difference between an equation & an identity; factorise quadratic expressions, including the difference of two squares. -Solve quadratic equations algebraically by factorising, completing the square and by using the quadratic formula. -Identify & interpret roots; deduce roots algebraically and turning points by completing the square. 	<p>National Curriculum Links Pupils will:</p> <ul style="list-style-type: none"> -Translate simple situations or procedures into algebraic expressions or formulae; derive an equation, solve the equation, solve the solution and interpret the solution. -Where appropriate, interpret simple expressions as functions with inputs & outputs; interpret the reverse process as the 'inverse function'; interpret the succession of two functions as a 'composite function'. 	<p>National Curriculum Links Pupils will:</p> <ul style="list-style-type: none"> -Compare lengths, areas & volumes using ratio notation and/or scale factors. -Construct & interpret equations that describe direct & inverse proportion. -Understand that X is inversely proportional to Y is equivalent to X is proportional to $1/Y$ 	<p>National Curriculum Links Pupils will:</p> <ul style="list-style-type: none"> -Reason deductively in geometry, number & algebra, including using geometrical constructions. -Apply & prove the standard circle theorems concerning angles, radii, tangents & chords. 	<p>National Curriculum Links Pupils will:</p> <ul style="list-style-type: none"> -Deduce expressions to calculate the nth term of linear and quadratic sequences. -Solve linear/quadratic inequalities in one or two variables, represent the solution set on a number line. 	<p>National Curriculum Links Pupils will:</p> <ul style="list-style-type: none"> -Interpret & use fractional & negative scale factors for enlargements. -Describe the changes & invariance achieved by combinations of rotations, reflections & translations. -Sketch translations & reflections of the graph of a given function. 	<p>National Curriculum Links Pupils will:</p> <ul style="list-style-type: none"> -Calculate the probability of independent & dependent combined events, using tree diagrams & other representations. -Calculate & interpret conditional probabilities through representation using expected frequencies. -Apply systematic listing strategies, including use of the product rule for counting. 	<p>National Curriculum Links Pupils will:</p> <ul style="list-style-type: none"> -"Show that" is used to encourage students to communicate in a clear mathematical fashion, and this skill should be transferred to their writing of solutions to any type of question. 	<p>National Curriculum Links Pupils will:</p> <p style="text-align: center;">Revision & examinations</p>
<p>This leads to:</p> <ul style="list-style-type: none"> A level Maths – Finding the equation of a line (or perpendicular) when given 2 points. 	<p>This leads to:</p> <ul style="list-style-type: none"> A level Maths – Graphs of more complex functions such as transformed trig functions. 	<p>This leads to:</p> <ul style="list-style-type: none"> A level Maths – More complex completing the square problems, algebraic division, factor/remainder theorem. 	<p>This leads to:</p> <ul style="list-style-type: none"> A level Maths – Graphing inverse functions, new notation such as domain/range. 	<p>This leads to:</p> <ul style="list-style-type: none"> A level Maths – More complex ratio problems. 	<p>This leads to:</p> <ul style="list-style-type: none"> A level Maths – Ambiguous case for sine rule, solving trig equations featuring transformations. 	<p>This leads to:</p> <ul style="list-style-type: none"> A level Maths – Arithmetic/Geometric sequences & series also finding the range of solutions for more complex quadratic inequalities. 	<p>This leads to:</p> <ul style="list-style-type: none"> A level maths – Applying transformations to functions and then sketching. 	<p>This leads to:</p> <ul style="list-style-type: none"> A level maths – Further work on conditional probability as well as independent and mutually exclusive events. 	<p>This leads to:</p> <ul style="list-style-type: none"> A level maths – New types of proof such as contradiction, deduction & exhaustion. 	<p>This leads to:</p>
<p>This links to:</p> <ul style="list-style-type: none"> Science – Plotting results and analysing data. Business studies – Identifying trends. 	<p>This links to:</p> <ul style="list-style-type: none"> Science / Business studies – conversion graphs either units of length etc or currency. 	<p>This links to:</p> <ul style="list-style-type: none"> Science – Accurately using formulae to find outcomes. 	<p>This links to:</p> <ul style="list-style-type: none"> Science – Rearranging and working between known formulae to find the required answer. 	<p>This links to:</p> <ul style="list-style-type: none"> Geography – Using scales when map reading. Technology – Scale drawings. 	<p>This links to:</p> <ul style="list-style-type: none"> Geography – Using a clinometer to gauge the distance of objects. 	<p>This links to:</p> <ul style="list-style-type: none"> Science – Using various formulae and manipulating to find the required outcome. 	<p>This links to:</p> <ul style="list-style-type: none"> Art / Technology – Knowing the importance of congruence to accurately scale up drawings. 	<p>This links to:</p> <ul style="list-style-type: none"> Business studies – Analysis of profit & loss plans, cash flows and various other representations of data. 	<p>This links to:</p> <ul style="list-style-type: none"> Science / English – Being able to give an hypothesis and give evidenced reasoning to back up your opinion. 	<p>This links to:</p>
